Fifth: Hotel Classification Manual

Introduction

The Hotel classification system identifies five different star categories which are further specified in 11 designators for the hotel categories. Table 1 outlines the different categories, license types, and classifications in the new Hotel accommodation system.

Table 1 Hotel designators and classifications

Category	Designators	Classifications
Hotels	Airport Hotel	1-5*
	Apartment Hotel	1-5*
	Beach Hotel	1-5*
	Boutique Hotel	4-5*
	Business Hotel	1-5*
	City Hotel	1-5*
	Convention Hotel	1-5*
	Family Hotel	1-5*
	Floating Hotel	4-5*
	Golf Hotel	4-5*
	Mixed Use	3-5*
	Resort Hotel	3-5*
	Shopping Hotel	3-5*

Hotels accommodate the of Bahrain's visitors and can therefore be said to have the most significant role to play in shaping a positive tourism experience. Hotels are not just places to sleep; they typically provide a wide range of services, facilities, and activities to feed, pamper, entertain, and excite our visitors. It is therefore no wonder that the hotel classification requirements in this manual are the most extensive in giving guidance to hoteliers to deliver the best possible experience to our visitors.

Hotel System Focus Areas

The hotel system has eight focus areas which impact the guest experience. Table 2 lists these areas and provides a description of what they represent.

Table 2 Focus Areas of Hotel Standards

Focus Area	Description
1) General Requirements	Administrative, legal, and other requirements
2) Public Areas	Requirements focussing on the hotel's public areas, building, safety and security and access control.
3) Guest Rooms	Requirements focussing on the individual guest rooms.
4) Guest Bathrooms	Requirements focussing on the individual guest bathrooms.
5) Guest Services	Requirements focussing on services offered to hotel guests.
6) Food & Beverage	Requirements focussing on the provision of Food & Beverages
7) Staffing	Requirements focussing on staffing policies and practices
8) Service Quality	Requirements focussing on the management and monitoring of service quality.

Hotel System Elements

To ensure that all areas of the hotel operation that influence the guest experience are well covered, the system covers a total of six elements that are defined in table 3.

Table 3 System Elements and their definitions

System Elements	Definition
1. Minimum Mandatory Criteria	<i>Criteria that reflect minimum expectations of the traveller and need to be completely fulfilled for each respective category</i>
2. Rating Criteria	<i>Criteria that reflect the quality of the hotel's infrastructure. Rating requirements focus on the quality of materials used, state of maintenance, presentation, and cleanliness. Hotels need to achieve a minimum final score for each respective classification category.</i>
3. Scoring Criteria	<i>Criteria that are not a traveller's minimum expectation but do create substantial value in the guest experience. Also here, hotels need to achieve a minimum final score for each respective classification category.</i>
4. Product Designators	<i>A term indicating the specific target group or hotel features that attracts a certain target group. The designator gives assurance that the specific services and facilities required by such target group are provided for. Product designator requirements comprise of Minimum Criteria that must be achieved; however, the application for a product designator is voluntary.</i>

The system criteria have been reviewed and enhanced by adding criteria that contemporary hotel guests expect, deleting out-dated criteria, restructuring criteria that were identified to be in the incorrect place in the system, and rewording criteria that may have presented a bias.

Minimum Mandatory Criteria

The minimum mandatory criteria reflect today's traveller minimum expectations of a hotel in the respective category. Minimum Mandatory Criteria provide the foundation of the system and the five categories in it and aims to ensure that the minimum Expectations of the guests of the respective category are fulfilled. The minimum mandatory criteria are detailed in chapter 1.

Rating Criteria

Rating criteria refer to those criteria that are responsible for the quality perception of the guest of the hotel's infrastructure, accessories or amenities and focus on cleanliness, state of maintenance, and the quality of materials used in the hotel's infrastructure. The rating scores have a strong focus on Guest Bedrooms (40%) and Public Areas (30%) and further focus on Guest Bathrooms (20%) and Food & Beverage Areas (20%). Table 4 presents the required minimum scores that need to be achieved for each classification category.

Table 4 Minimum Rating Requirements for each Hotel Classification

Rating	Rating Requirement (Max 400)	Standard on Total Points %	Minimum score for any Individual Standard
1 Star	240	60%	40%
2 Star	260	65%	40%
3 Star	300	75%	60%
4 Star	340	85%	60%
5 Star	360	90%	80%

From table 4 it can be seen that a one-star hotel will have to score 60% of the total points, thus 240 points, and cannot score below 40% on any one standard. A five-star hotel will need to achieve a total score of 90% of the total points and cannot score below 80% on any one standard. The detailed rating criteria are detailed in chapter 2.

Scoring Criteria

Scoring criteria refer to facilities or services that present a value but are not necessarily vital to a minimum expectation of a guest when considering the respective star rating. The scoring criteria thus represent an element of the system of objective tangible facilities and services that add value to the guest, but do not comprise a must. Criteria are presented that contemporary research shows are valued by today's hotel guest with a rating structure that is based on the perceived value of those requirements. The scoring criteria are presented in chapter 3. The minimum scores for each classification category are presented in table 5.

Table 5 Minimum Scoring Requirements Hotels

Rating	Required %	Total Score
1 star	40%	90
2 star	50%	113
3 star	60%	135
4 star	70%	158
5 star	80%	180
Total	100%	225

From table 5 it can be seen that the minimum percentage score for the scoring requirements ranges from 40 to 80 percent of the available points. This means that, for instance, a three-star hotel needs to achieve 135 points on the scoring criteria which is 60% of the total points that can be achieved.

Hotel Designators

In addition to the 1–5-star rating, the hotel system makes provision for hotels to position themselves by obtaining a 'designator'. This allows travellers to easily identify the 'type' of hotel that they are looking for over and above comfort and service level. A total of 10 designators apply that are applicable to different hotel classification as indicated in table 1.

Designators are awarded after the hotel has met the requirements of the respective designators. Certain designators may create exemptions from Minimum Mandatory Criteria. An example is the designator of airport hotels that exempts the hotel with complying with minimum room sizes if it is situated right at the airport.

The Hotel Classification Process

This section outlines the processes involved in applying for and renewing the hotel classification. First an outline is presented in the entire system after which the typical processes are outlined.

The classification process is designed to be both efficient and effective. Figure 1 outlines how the different elements of the system are approached from a process perspective:

Figure 1 The classification process

In figure 1, the following processes are outlined:

- 1) A hotel will first need to comply with the *Minimum Mandatory Criteria* for its category. These criteria reflect the minimum expectations that a guest would have of the rating applied for and must be fulfilled.
- 2) Second, it needs to obtain a minimum score for its respective category on the *Rating Criteria*. These criteria represent subjective tangible criteria that represent the respective category, and also have a minimum score that needs to be obtained on each individual criteria depending on the classification category being pursued.
- 3) Third, a minimum score needs to be attained on the *Scoring Criteria*. The scoring criteria represent objective tangible criteria that add value to the guest but do not necessarily reflect a minimum expectation.
- 4) The Hotel Classification is determined by the first three steps of the process and is awarded based on the complete fulfilment of the Minimum Mandatory Criteria and the attainment of the minimum scores for the Rating and the Scoring Criteria, though simultaneously, one or more *Hotel Designators* may be applied for. The awarding of a designator requires minimum criteria to be fulfilled that differ per classification.

Implementation & Industry Support

The enhanced criteria have been drafted with the existing hotel infrastructure in mind. The intention is to avoid scenarios whereby an existing hotel would have to incur significant costs to maintain its hotel classification. Therefore, most criteria are expected to impose only minor expenses, or may apply only to newly built hotels. The conditions surrounding such requirements are indicated in the criteria chapters by means of footnotes. Changes to processes may occur from time to time and will be communicated by the Bahrain Tourism and Exhibitions Authority in writing.

a) Online System

The classification system is integrated in a comprehensive Online System that maintains all available data on Bahrain's hotels. It facilitates the identification of improvement areas for hotels and maintains a history on communications and actions involving a hotel including its inspection cycle.

b) Self-Assessment

To enhance the participation and feedback from the hotel industry, hotels can be registered in the system for *Self-Assessment* preceding the formal assessment. With this facility, the Department expects to create a positive dialogue with the hotel industry with mutual benefit.

c) Complaints and Appeals

Each hotelier has a right to appeal or complain about a standard, process, its interpretation, or execution. The Department has procedures in order to handle all customers' complaints in a professional and timely manner. The following principles govern this process:

- All Hotel Establishment related complaints are acknowledged within one working day.
- Where required, supporting documentation will be requested.
- The facts of the complaints will be verified.
- If required, an investigation will take place.
- The hotel will be kept informed of the status and the outcome of the complaint.

Classification and Inspections

The classification process will be implemented periodically every four years by prior notification of the Bahrain Tourism and Exhibitions Authority, followed by inspection visits to make sure all deficiencies are addressed.

The Department will conduct various types of inspections. Listed below are the inspection types and a brief description of each inspection.

Initial Inspections

When a new hotel applies for any type of short stay accommodation license, an inspection will be held to verify, rate, and score the infrastructure of the accommodation prior to it being allowed to operate.

Soft Opening

Upon completion of the construction work and acquiring Civil defense Certificate, an inspector will perform an inspection of the building in order to issue a temporary operating license to allow for a 'soft opening'

The above temporary operating license is conditional based on the below stipulations:

- 1- **Duration:** The duration of the temporary license is for a period not exceeding 3 months. No renewal or extension beyond the 3 months period except with genuine justification that the concerned department of Bahrain Tourism and Exhibition Authority sees appropriate.
- 2- **Monthly Reports:** The License holder shall send monthly reports on the progress of his readiness to achieve full operation.
- 3- **Compliance:** The License holder shall always be obliged to all the obligations and requirements mentioned in the Tourism Laws, regulations, and circulars.

The concerned department at Bahrain Tourism and Exhibitions Authority may suspend the temporary license in case of non-compliance with the above stipulations.

Periodic Inspections

After an initial license and classification has been awarded, the Bahrain Tourism and Exhibitions Authority will conduct annual or bi-annual inspections to ensure that standards continue to be met. Periodic Inspections can be in a form of comprehensive list as in the classification manual or in form of short list of basic elements specified by the department.

Inspections after a complaint has been received by the Department.

Should the Department receive a complaint about an establishment, it has a responsibility to investigate the complaint, and this may include an inspection visit of the establishment

Spot check inspections carried out ad hoc by the Department.

Department inspectors may conduct spot checks on an ad hoc basis in order to ensure that establishments are complying with the required standards of both their license and the respective classification. This may be in the form of announced, unannounced

Building status

The Department conducts a comprehensive inspection of the building status every 4 years to evaluate the upkeep of the building and periodic renovation. This inspection includes the general maintenance, walls, facades, painting..etc.

Violations

It may occur that during a classification inspection, inspectors identify serious violations that may:

1. Jeopardise the safety of guests;
2. Are unhygienic to the extent of creating a health hazard;
3. Jeopardise the reputation or the good order in the Kingdom;
4. Comprise an illegal activity; or
5. Not fulfilling the requirements of any other government authority, specially these related to Health and Safety like Public Health requirements and Civil Defence requirements.

Inspectors, by nature of their job, are bound to report any of these matters, and may decide to close part of the hotel, or the entire hotel.

Exemptions on Minimum Mandatory Criteria

Despite elaborate research and test runs that lie at the basis of the classification system, it may be that existing hotels cannot comply with a requirement in their respective category. In such case the hotel may apply for exemption of the respective requirement. This exemption request needs to specify:

1. Why the hotel cannot comply with the specific requirement.
2. How it seeks to overcome the lack of compliance in terms of the guest experience.

The department will review each request based on:

- a. The reasoning provided by the hotel;
- b. The impact on the guest experience; and / or
- c. The further compliance with Minimum Mandatory Criteria, and the respective scores on the Rating Criteria and Scoring Criteria.

1. Hotel Minimum Mandatory Criteria

The objective of the Minimum Mandatory Criteria is to:

2. Rating Criteria

Rating criteria are intended to ensure that standards of facilities and amenities are representative of the respective hotel rating. Rating criteria thus focus on:

1. The quality of facilities and amenities.
2. The condition of facilities and amenities.
3. The cleanliness of facilities and amenities; and
4. The functionality of facilities and amenities.

Rating criteria are subjective and can thus only be assessed through a rating score whereby the inspector assesses the above four items, typically on a scale of 1-10. The weight of areas of the hotel operation is linked to the importance that the guest places on that area. Therefore, one will find many more areas, and thus points, allocated to guest rooms opposed to, for instance, certain public areas. The following table outlines the focus areas and point allocation.
